

EFFECTIVE: 13 SEP 2018

Routing for VFR flights departing Egelsbach with subsequent flight rule change to IFR within Frankfurt terminal area:

To provide Egelsbach VFR departures changing subsequently to IFR with an early beginning of the IFR part of the flight and to guarantee correct flight strip printing for these flights the following procedure shall be applied.

The actual routing may possibly be deviating from the routing indicated in the flightplan. In field 15 of the flightplan the following fixes and/or ATS routes are to be used: (note: alterations may lead to the fact that the competent DEP-control unit is not provided with an FPL - the FPL then has to be completely refilled!)
